TICCIH 2006, XIII Congress of the International Committee for the Conservation of the Industrial Heritage, is organized with the contribution of

Regione Umbria

Comune di Terni

Centro Italia
Letter of invitation

Dear friend and colleague,

we are pleased to inform you that The International Committee for the Conservation of the Industrial Heritage’s XIII Congress (TICCIH 2006) will take place on the 14th-23rd September 2006. We have already received an exceptional number of bookings. We would like to thank those of you who have already registered as this has allowed us to decrease the overall cost of the Congress.

Please confirm your booking and complete your payment by the 31st May 2006. You will be able to register until the 31st July 2006, but a supplement will be charged. A third brochure with the final programme will be sent to you by the 30th June 2006.

We have also received a high number of proposals for sessions, workshops and individual papers. The Organising Committee is currently selecting papers. The Committee has also decided to postpone the deadline for the submission of proposals to the 30th April 2006. The acceptance of proposal submitted will be communicated by the 15th May 2006.

Presentations at sessions and workshops will be allocated a time that will be decided by the session’s organiser. In some cases presentations could be replaced by a round-table discussion. The Organising Committee will also be in charge of including papers into sessions or creating new strands. The final number of workshops and individual papers. The Organising Committee is currently selecting papers. The Committee has also decided to postpone the deadline for the submission of proposals to the 30th April 2006. The acceptance of proposal submitted will be communicated by the 15th May 2006.

The scientific part of the Congress will be held in Terni from Thursday 14th to Monday on 18th of September in the afternoon. Sunday 17th September will be dedicated to official meetings and visits in Rome. Other visits to industrial heritage sites in the areas surrounding Terni will be made during the Congress. This programme will be followed by post-congress tours with the possibility of choosing between: (A) a short trip beginning on 18th of September in the afternoon and finishing on 20th of September; this includes visits to the most important industrial sites and museums in Naples, Minturno, Caserta, San Leucio, Gragnano, Furore, Pietrarsa and also the Amalfi coast. (B) a longer trip beginning on 18th of September in the afternoon and finishing on 23rd of September. This includes some of the main Italian industrial centres and artistic cities: Florence, Prato, Bologna, Venice - Porto Marghera, Schio, Valdagno, Tavernole sul Mella, Dammine, Crespi d’Adda, Sesto San Giovanni, Milan, Pray, Biella, Turin and Genoa. The tour ends in Terni (or Rome), though delegates many choose to depart from Milan on 21st of September.

During the Congress, an exhibition will be organised at the SIRI – Società Italiana Ricerche Industriali (Italian Industrial Research Society) centre in Terni. This will present new books, multimedia works, and projects and overviews concerning industrial heritage, in particular in Italy.

The Congress will be preceded by a series of conferences in Italy dedicated to: the heritage of mines (in Sardinia in May 2006), agriculture and food (in Apulia in June 2006) and industrial landscapes (in Piedmont in July 2006).

The programmes of these conferences will be sent to all participants and will be posted on the Congress’s website (www.ticcihcongress2006.net). For further information, please contact us by using our mailing address in this brochure.

On behalf of the TICCIH 2006 Work Group, we look forward to welcoming you to Italy in September 2006.

Kind regards,

Giovanni Luigi Fontana
Eusebi Casanelles
Franco Giustinelli

in collaboration with
GENERAL INFORMATION

Congress Dates
From Thursday 14th to Monday 18th September 2006.

Abstracts
The abstracts of contributions will have to be sent to the Congress Secretary’s Office (Attachment n. 1) within 30th April 2006.

Post congress itineraries

- First itinerary: from Monday 18th to Wednesday 20th September 2006
  Minturno, Caserta, San Leucio, Gragnano, Amalfi, Furore, Pietrarsa, Naples.

- Second itinerary: from Monday 18th to Saturday 23rd September 2006

Registration
All participants must confirm or make their registration and pay their Congress fee by the 31st of May 2006. Participants must also indicate and pay the fee whether they want to take part to a post-Congress itinerary.

Registration fees
(valid for participants who apply within May 31st 2006)
In order to answer to different demands of participants, registration fees have been separated from hotel accommodation fees. Registration fees include: meals, transfers from hotels to Congress venues, visits during Congress (Termini and Rome), secretarial assistance, simultaneous translations and all Congress materials. Registration fees are shown below:

| TICCIH Members | 450,00 euros |
| Non TICCIH Members | 472,00 euros |
| Accompanying people | 300,00 euros |
| Young participants* | 200,00 euros |

* less than 32 years at the date of the beginning of the Congress.

Registration fee for only two days of Congress
It is possible to apply for only two days of Congress. In that case the registration fee is 250 euros.

Registration after May 31st 2006
It is possible to apply for the Congress up to 15th of July 2006. In such case the registration fee will increase by 10% (TICCIH Members 495,00 euros, Non TICCIH Members 519,00 euros, accompanying people 330,00 euros, young participants 220,00 euros, two days participants 275,00 euros).

Hotel accommodation fees
The organization will guarantee hotel accommodation all through the Congress (4 nights) for participants who apply within 31st of May 2006. There are two accommodation options available, as shown below:

<table>
<thead>
<tr>
<th>Participants</th>
<th>Single room</th>
<th>Double room</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>236,00 euros</td>
<td>148,00 euros</td>
</tr>
<tr>
<td>Young participants * (central hotel)</td>
<td>224,00 euros</td>
<td>142,00 euros</td>
</tr>
<tr>
<td>Young participants* (not central hotel)</td>
<td>142,00 euros</td>
<td>116,00 euros</td>
</tr>
</tbody>
</table>

* less than 32 years at the date of the beginning of the Congress.

Hotel accommodation fees for only two days of Congress
Hotel accommodation for participants who apply for only two day of Congress is guaranteed as well. The fees are (for each person): 64,00 euros/night in single room or 40,00 euros/night in double room.

Hotel accommodation fees for registration after May 31st 2006
From the 31st of May 2006 to the 15th of July 2006 hotel accommodation fees will increase by 10%.

Post-congress itineraries fees
The fees will include meals, transfers and hotel accommodation. Prices are shown below:

- First itinerary (18th-20th of September)
  Minturno (bridge over the Garigliano River), Caserta (San Leucio silk mill), Gragnano (flour mills and pasta factories), Amalfi (“Valle dei Mulini”), Furore (Open air museum), Pietrarsa (National Railway Museum), Naples (former ILVA area of Bagnoli and Science Museum inside): 300,00 euros per person with accommodation in single room; 250,00 euros per person with accommodation in double room.

- Second itinerary (18th-23rd of September)
  Florence (historic centre), Prato (Textile Museum, Val di Bisenzio), Bologna (Industrial Heritage Museum, “Chiusa di Casalecchio”), Venice (Porto Marghera complex, Venice Arsenal, Stucky Mills, Santa Marta Cotton factory), Schio (Lanerossi-Conte factories, “Alessandro Rossi” New Quarter), Valdagno (Marzotto plant and “Città sociale”), Tavernole sul Mella, Dalmine (company town), Crespi d’Adda, Sesto San Giovanni (Industry and Work Museum), Milan, Pray (“Fabbrica della Ruota”), Biella (“Via della Lana” and Pria wool factory), Turin (“Lingotto” and industrial reconversion area), Genoa (“Gru Maestrale”, Cotton Warehouses, “Porta Siberia”, Ancient Docks and Silos Barns, Sea Museum): 650,00 euros per person with accommodation in single room; 500,00 euros per person with accommodation in double room.

Methods of payment

Payment by bank transfer to
ICSIM
Banca Nazionale del Lavoro, Terni

National banking details
0000000200006 (c/c)
V (cin) 01005 (abi) 14400 (cab)

Please point out the motives of the payment:
- Congress fees TICCIH 2006
- First itinerary fee (September 18th-20th)
- Second itinerary fee (September 18th-23rd)

International banking details
IT36V0100514400000000200006
Address SWIFT BIC: BNL I I TRR

Please point out the motives of the payment:
- Congress fees TICCIH 2006
- First itinerary fee (September 18th-20th)
- Second itinerary fee (September 18th-23rd)

IT IS NECESSARY TO SEND
A COPY OF THE BANKING CREDIT TRANSFER TOGETHER WITH THE REGISTRATION FORM (ATTACHMENT 2)

Right of Recess
A 75% repayment is possible for cancellations received by the Congress Secretary’s Office within August 10th 2006. After this date no repayment is possible.
Congress Venue

The XIII TICCIH Congress will be held in Terni at the industrial complex previously owned by SIRI – Società Italiana Ricerche Industriali (Italian Industrial Research Society), recently converted into a Museum and Cultural Centre.

Workshop Programme

Workshops will begin on Thursday 14th September and will end on Monday 18th September 2006.

The Board meeting and the meetings of specialist groups and of the TICCIH national representatives will take place at the same time as the registration of participants (12am-5.30pm). The official opening of the Congress (including a welcome from the public authorities and an introductory speech) will be held at 6pm at the film studios located in the former Papigno electro-chemical plant. This event will be preceded by a visit to the industrial area and will be followed by a visit to the famous Marmore Falls. The Congress will organise transport facilities for all participants.

The programme of the Congress is composed of two plenary sessions (on Friday 15th and Saturday 16th September in the morning) and two parallel sessions with sixteen specialised strands (Friday 15th September in the afternoon and Monday 18th September in the morning).

Field trips to the industrial heritage sites of Conca Ternana will take place on the evening of Friday 15th and the afternoon of Saturday 16th September. A meeting with the local authorities will be held at the University of Roma Tre on Sunday 17th September and will be followed by a visit to the former manufacturing area of Ostiense-Testaccio, today used by public, private and cultural institutions.

The TICCIH congress will end with the General Assembly on Monday 18th September at 12am.

Official Languages

English and Italian (a simultaneous translation service will be provided for the plenary sessions in both languages).

Arnaldo Pomodoro, “Lancia di luce”.

Session Organisation

There will be two plenary sessions and sixteen workshops.

Plenary Sessions

Two plenary sessions will consist of 15 minutes-long papers. These will be dedicated to the following topics:

A. Industrial heritage and urban transformation

All industrialised countries, regions and cities are involved in the process of recognising and evaluating industrial heritage. This informs policies on urban regeneration and territorial competitiveness. In particular, the problems concerning derelict urban areas are now the centre of interest of industrial heritage. The Scientific Committee seeks contributions aimed at analysing the impact of old or recent productive activities in different urban and territorial contexts, whether pre-existing or developed ex-novo (as in the case of company towns), with a focus on relational, organisational and immaterial aspects. The Scientific Committee also encourages contributions surveying cases of successful urban planning (i.e. able to overcome the dichotomy between culture and economy and to integrate the correct re-use of former industrial sites within a wider programme for future developments of towns and wider areas).

B. Productive areas and industrial landscapes

Many areas have given birth to productive specialisation using a specific mix of resources that are either locally available or have been produced through specific historical processes. A relationship between industry and environment has emerged from diverse paths of development. This has characterised the landscape according to different models of industrialisation and the specific types of productive processes located in such areas. What we can define as ‘artificial landscapes’ can acquire new aesthetic qualities through strategies of regeneration. These are based on the conservation of industrial artefacts and buildings that are at the origin of profound environmental changes. The Scientific Committee seeks contributions aimed at analysing the evolution of processes of production deeply rooted in specific territorial contexts. The Scientific Committee also welcomes contributions on environmental reintegration with specific reference to the transformations caused by the process of industrialisation. Particular attention will be dedicated to the reclaiming of land (draining) and the ‘re-naturalisation’ of mining and industrial sites.

Workshops

Each workshop of the two parallel sessions will be dedicated to a specific theme. Attendants will be able to choose between 16 different workshops. The Scientific Committee seeks eight papers for each of the above themes. Papers must be no longer than 10 minutes. Please note that the number of sessions will depend on the total number of proposals.

The Scientific Committee has decided that one workshop will be dedicated to The concept of industrial heritage: scenarios, boundaries and perspectives. If you wish your paper to be included in this workshop, please indicate it in your proposal.

Workshops 1 – 8

1. Know-how: surveying and classification

The Scientific Committee welcomes papers on the use of new methods for inventoring and classification. These can include papers discussing the results obtained by the use of different computer systems, the use of data in town and territorial planning and in heritage conservation and re-use.

2. Protection: juridical and legislative instruments

Notwithstanding recent important developments, the protection of industrial heritage is still far from establishing national or international legal standards that will provide a conceptual and practical framework. The aim of this workshop is to evaluate the legal solutions adopted so far. Discussion is welcome between those who propose the adoption of restrictive regulation (in line with the criteria applied for cultural and artistic-historical heritage), and those who support less rigid solutions.
3. Planning: restoration, re-use and transformation
The quality of architectural planning plays an essential role in the recovery and re-use of industrial archaeological heritage. Such quality depends more on the appropriateness of design rather than on methodological rules. It is therefore necessary for the architect/designer to be aware of the most important results achieved in the sector in order to evaluate which factors will be most influential in the success of his/her work. The Scientific Committee seeks contributions showing ‘good practices’ in planning, in adopting new functions and uses for industrial heritage, and in connecting architectural planning with cultural, economic and entrepreneurial variables.

The aim of this workshop is to understand how industrial heritage can acquire value through the adoption of specific institutional policies and adequate management choices. Examples and case studies should guide the discussion. Special attention will be dedicated to the governance and marketing of cultural institutions; the use of human resources; financial planning, and the integration of the activities within the wider context of the economic, competitive and individual dynamics of businesses, regions and local productive systems.

5. Communicating the role of industry and its historical identity
This workshop will concentrate on the ways in which industrial heritage can be interpreted and communicated. The Scientific Committee seeks contributions concerning web sites, portals, and teaching experiences on industrial and scientific heritage. Special attention will be dedicated to the relationship between sponsorship and communication.

6. Use: cultural tourism and industrial tourism
Areas that did not complete their path of development or declining economies can use the enhancement of heritage and its potential indirect effects as an opportunity for constructing new models of growth centred on tourism and based on the provision of services. This workshop will concentrate on how industrial heritage is used by tourist offices, authorities and operators, within the wider cultural heritage of a specific area. Particular attention will be given to the ways in which industrial heritage is used as a way of increasing tourism and its possible negative effects. Contributions are welcome on the theme of tourist advertising that promotes industrial heritage within a variety of cultural heritage attractions (environmental, naturalistic, archaeological, historical-artistic, etc.).

7. New planning expertise and training
There is an ever-increasing need in the field of industrial heritage for highly-trained personnel, able to fill professional positions that require multi-disciplinary experience and expertise. In recent years the professional profiles of these operators have been redefined and the need for new project expertise has increased. The Scientific Committee seeks contributions on university and extra-university training programmes and courses, aimed at producing professionals to work in industrial archaeological heritage. Contributions should illustrate objectives, expertise, study methods and contents, work activities and results obtained by trained personnel, including reference to distance training carried out nationally or internationally.

8. Enhancement of heritage and ‘multi-scale’ development strategies
The complexity and number of people involved in the process of identifying and regenerating industrial heritage is increasing. Such projects can include huge international organisations like Unesco, European and national institutions, regional or local organisations. This workshop seeks papers from those who have acquired experience in the territorial aspects of industrial heritage, and dealt with the multiple facets of the integration of local systems at different levels according to processes such as ‘from local to global and back again’.

9. Crafts and trades, expertise and traditional production
We seek contributions dealing with the loss and the disappearance of old crafts, trades and special productive techniques or inputs. Papers should discuss possible ways of preserving ancient techniques and occupations and their relationship with industrial heritage, specifically in de-industrialised areas.

10. Technical archives
This workshop will focus on the conservation and re-classification of archives containing technical drawings of machinery, productive plants and equipment. This is an emerging field in many countries and at the centre of the attention of industrial archaeologists. Its importance lies with the rapid obsolescence of techniques and machineries and the necessity to create an efficient ‘memory’ store.

11. Agriculture and the food industry heritage
Contributions should focus on the ways in which the food-producing and food processing industry has developed, the role that this sector has played in international trade in recent decades, on the consumption of new products, and on food products developed by businesses. Special attention should be given to museums, business archives, and the preservation of productive plants and machinery.

12. The heritage of Textile and clothing industries
This workshop will focus on recent scientific developments in the textile sector, on the links between proto-industry and modern industry, on the relations between demand and productive techniques, with special attention to fashion and the clothing sector.

13. The heritage of steel works and the mechanical industry
Contributions should concentrate on the projects and interventions that followed the closing down of many steel and metal-working plants, on the problems related to conservation and the solutions adopted in different countries and regions.

14. Mining heritage
The Scientific Committee seeks contributions concerning the preservation of mining areas in an international context, and on recent experiences in creating museums, with a special focus on the working conditions and lifestyle of miners.

15. Industrial heritage in the chemical sector
Chemical plants have undergone considerable changes and transformations over the past twenty years. Many plants have now disappeared. Contributions should focus on derelict sites, reclaiming procedures, re-use techniques for buildings and problems concerning equipment conservation.

16. Energy supply lines, communication networks and industrial infrastructures
This workshop will concentrate on energy supply and transport systems, with special attention given to railways and their re-use and new tourist functions. Attention should be paid to large railway museums and the evolution they have undergone in the last ten years. The workshop should also include contributions concerning industrial infrastructures or urban services for industrial purposes.
Visits

1. Visits during Congress
Study visits have been organised during the Congress to the following sites: the Marmore Waterfalls, Piediluco Lake, Steelworks of the ThyssenKrupp group, Hydro-electric power station of the Endesa group at Galleto and Monte Sant’Angelo, and workers’ housing areas.

Visits have also been planned to other former or re-used industrial areas in Terni: Papigno electro-chemical plant, SIRI plant, and the Guns Factory Museum. Visits will also be made to industrial areas and production buildings in Rome, now converted for cultural activities: Ostiense, “Montemartini” thermo-electrical plant, the University Roma Tre.

These visits will provide the opportunity for an introduction to Italian industrial heritage and to examine the special interaction between industrial heritage and the classical cultural heritage of ancient Rome. Each Visit will be preceded by an introduction – to be held at the University Roma Tre – on the importance of the site, its history, and the economic, social and environmental context in which it is located. Particular attention will be given to projects that are underway or have already been completed. The afternoon is free.

2. Post-Congress Itineraries
Two possible tours will start at the end of the Congress. Participants will travel in coaches. These visits are an integral part of the Congress and will be accompanied by presentations on site. The itineraries selected will demonstrate the specific nature and wide variety of the territorial and historical aspects that characterised the long process of industrialisation in Italy. They include old manufacturing areas, proto-industrial centres, and modern industrial sites. Visits will focus on the following sectors: textiles, construction, steel, mechanical and chemical. These will include some of the most relevant examples of the renovation and the re-use of industrial heritage.

- The first itinerary – and the shorter of the two – will begin on the 18th September in the afternoon and will end on the 20th September. The tour includes visits to the most important industrial sites and museums in Naples and the Campania region: Minturno (bridge over the Garigliano River), Caserta (San Leucio silk mill), Gragnano (flour mills and pasta factories), Amalfi (“Valle dei Mulini”), Furore (Open air museum), Pietrarsa (National Railway Museum), Naples (former ILVA area of Bagnoli and Science Museum inside).

- The second itinerary will begin on the 18th September in the afternoon and will end on the 23rd September. The itinerary will include some of the main Italian industrial centres and artistic cities: Florence (historic centre), Prato (Textile Museum, Val di Bisenzio), Bologna (Industrial Heritage Museum, “Chiusa di Casalecchio”), Venice (Porto Marghera complex, Venice Arsenal, Stucky Mills, Santa Marta Cotton factory), Schio (Lanerossi-Conte factories, “Alessandro Rossi” New Quarter), Valdagno (Marzotto plant and “Città sociale”), Tavernole sul Mella, Dalmine (company town), Crespi d’Adda, Sesto San Giovanni (Industry and Work Museum), Milan, Pray (“Fabbrica della Ruota”), Biella (“Via della Lana” and Pría wool factory), Turin (“Lingotto” and industrial reconversion area), Genoa (“Gru Maestrale”, Cotton Warehouses, “Porta Siberia”, Ancient Docks and Silos Barns, Sea Museum).

The tour ends in Rome, although it is possible to depart from Milan airport or via a transfer to Rome airport on the 21st September.
Guidelines for submitting abstracts

1. All papers will be presented during the Congress. Papers can be the result of individual or collective research and/or the presentation of specific experiences that raise awareness of industrial-archaeological heritage. These may include presentations on projects and realisations concerning restoration, re-use, and transformation; and/or reports on important initiatives for the conservation, enhancement, and management of industrial heritage. The Scientific Committee will assess all proposals according to the following criteria:
   - methodological originality;
   - development of new theoretical concepts;
   - international and local importance;
   - originality of content matters;
   - level of interrelation between different operational contexts;
   - characteristics of ‘best practices’.

Papers delivered at Plenary Sessions must be no longer than 15 minutes. Papers presented in Parallel Sessions must be no longer than 10 minutes.

All accepted papers will be published on the Congress website: www.ticcihcongress2006.net and in a CD-ROM of the Proceedings of the XIII Congress.

2. Proposals should be no longer than 500 words and must be submitted in English or Italian. They can include drawings, photographs and notes.

3. Proposals should be submitted in a Word document, format 12 Times New Roman. The title must be in capital letters and should be followed by the name(s) of the author(s) and current institution.

4. Please state the Plenary Session (A or B) or the Parallel Session (1 – 16) in which you wish to present your paper.

5. Send 3 paper copies of your abstract, and the relative electronic file on a floppy disk or CD-ROM. Proposals must be in Microsoft Word or an equivalent programme and must be sent to the Congress Secretary’s Office. Floppy disks or CD-Roms must be clearly labelled with the title of your proposed paper and the writing programme used.

6. Proposals must be sent to the Scientific Committee to:

   Congress Secretary’s Office TICCIH 2006
   ICSIM - via I Maggio, 23
   05100 Terni (Italy)
   tel. 0039 0744 407187 / 0039 0744 471528
   fax 0039 0744 407468
   e-mail: info@ticcihcongress2006.net

7. Abstracts must reach the Secretary of the Congress by the 30th April 2006.

8. Authors will be informed of outcome by the 15th May 2006.

Signature ___________________________________

I agree to the treatment of my personal data according to the Italian law 675/96 and further modifications and integrations necessary for the Congress organisation.
Al Congresso seguiranno due itinerari di visita:

L’itinerario post-Congresso più breve, dal 18 settembre al 23 settembre, comprende i maggiori centri industriali italiani e le città d’arte: Firenze (centro storico), Prato (Museo del Tessuto, Val di Bisenzio), Bologna (Museo del Patrimonio Industriale, Chiusa di Casalecchio), Venezia (Porto Marghera, Arsenale, Mulino Stucky, Cotonificio di Santa Marta), Schio (Area Lanerossi-Conde, Nuovo quartiere “Alessandro Rossi), Valduggia (Complejo Marzotto e “Città sociale”), Tavernole sul Mella, Dalmine (company town), Crespi d’Adda (fabbrica e villaggio operaio), Sesto San Giovanni (Museo dell’Industria e del Lavoro), Milano, Pray (“Fabbrica della Ruota”), Biella (“Via della Lana” e Lanificio Pria), Torino (Lingotto e aree di riconversione industriale), Genova (Gru Maestrale, Magazzini del Cotone, Porta Siberia, Antica Darsena e Silos Granai, Museo del Mare).
Per chi lo desidera, vi sarà la possibilità di accorciare l’itinerario con una partenza anticipata dall’aeroporto di Milano, o da quello di Roma, nella giornata del 21 settembre.

Two possible tours will start at the end of the Congress:

The first itinerary will begin on the 18th September in the afternoon and will end on the 20th September. The tour includes visits to the most important industrial sites and museums in Naples and the Campania region: Minturno (bridge over the Garigliano River), Caserta (San Leucio silk mill), Gragnano (flour mills and pasta factories), Amalfi (“Valle dei Mulini”), Furore (Open air museum), Pietrarosa (National Railway Museum), Naples (former ILVA area of Bagnoli and Science Museum inside).

The second itinerary will begin on the 18th September in the afternoon and will end on the 23rd September. The itinerary will include some of the main Italian industrial centres and artistic cities: Florence (historic centre), Prato (Textile Museum, Val di Bisenzio), Bologna (Industrial Heritage Museum, “Chiusa di Casalecchio”), Venice (Porto Marghera complex, Venice Arsenal, Stucky Mills, Santa Marta Cotton factory), Schio (Lanerossi-Conde factories, “Alessandro Rossi” New Quarter), Valduggia (Marzotto plant and “Città sociale”), Tavernole sul Mella, Dalmine (company town), Crespi d’Adda, Sesto San Giovanni (Industry and Work Museum), Milan, Pray (“Fabbrica della Ruota”), Biella (“Via della Lana” e Pria wool factory), Turin (“Lingotto” and industrial reconversion area), Genoa (“Gru Maestrale”, Cotton Warehouses, “Porta Siberia”, Ancient Docks and Silos Barns, Sea Museum).

The tour ends in Rome, although it is possible to depart from Milan airport or via a transfer to Rome airport on the 21st September.
The International Committee for the Conservation of Industrial Heritage is an organization international founded in 1978 in Stockholm. The initiative for an international body was originally discussed when the Ironbridge Gorge Museum was founded in 1973 under the direction of Sir Neil Cossons, now Chairman of English Heritage. Today, TICCIH is the only world organisation on Industrial Heritage. The development of TICCIH has been based on major congresses in Europe and North America organised either biannually or triennially. These have been supplemented by specialised conferences, workshops and meetings aimed at developing personal and institutional contacts at an international level. From the work of a small number of countries, the concept, study and encouragement of Industrial Heritage has substantially developed in recent years. This has been possible thanks to the cooperation of universities, public agencies, cultural institutions, museums and private businesses. The Committee is composed of a group of specialists interested in enlarging the Cultural Heritage with the history of technology, society and architecture in the industrial field. The Committee is also a viable tool for communication in a network that now counts more than 60 countries and 500 members. Since the early 1980s the Committee has been advising the World Heritage Committee part of ICOMOS (International Council for Monuments and Sites) - UNESCO on buildings, sites and industrial landscapes to be included among World Heritage sites. TICCIH publishes a quarterly Newsletter and supports the publication of the Journal Patrimoine de l’Industrie/Industrial Patrimony, published twice a year.

The International Committee for the Conservation of Industrial Heritage is an organization international fondée en 1978 à l’occasion d’un congrès de spécialistes qui se tenait à Stockholm, mais qui prend en fait son origine dans la création de l’Ironbridge Gorge Museum Trust en 1973 et dans l’action de Sir Neil Cossons, aujourd’hui président d’« English Heritage ». TICCIH demeure à l’heure actuelle le seul réseau mondial de spécialistes du patrimoine industriel.
